

Shaun Campbell

WORK EXPERIENCE

DLF Law Group, LLC

📍 Brookfield, WI

Automation and Analytics Manager

📅 Jan 2024 – Present

- Developed and maintained Python automation scripts hosted on Azure Virtual Desktop VMs, utilizing automated task scheduling to maximize business process efficiency.
- Constructed data pipelines and Power BI dashboards for management to monitor workflows and the financial performance of the firm.
- Interfaced internal software with the Wisconsin state circuit court database via REST APIs, ensuring data compliance and accuracy.
- Developed a program to facilitate document and data transfers with five service of process vendors, utilizing SFTP for maximum security.
- Created a centralized logging system to save logs to a network database, and built a local web app to monitor script executions and exceptions.
- Implemented a semantic text classification system using mean-pooled embedded prototypes to automatically categorize legal documents.

IT Associate

📅 May 2020 - Dec 2023

- Designed and updated custom SQL reports for clients and internal teams using Microsoft Report Builder.
- Set up automated ETL processes to ingest, parse, and map incoming client data into internal databases.
- Built and distributed lightweight desktop programs with graphical interfaces, enabling non-technical users to perform tasks more efficiently.

PROJECTS

A Comparative Study of Density-Based and Generative Resampling Methods for Imbalanced Credit Card Fraud Detection

Marquette University – Advanced Machine Learning

- Performed a comparative study of Kernel Density Estimation (KDE) and Generative Adversarial Networks (GANs) as advanced alternatives for synthetic data generation for credit card fraud data.

Few-Shot Text-To-SQL with Gemini 2.5 Flash

Marquette University – Fundamentals of Artificial Intelligence

- Implemented the DIN-SQL (Pourreza & Rafiei, 2023) method using Gemini 2.5 Flash to transform natural language text prompts into SQL queries.

Access to Credit and Financial Well-Being

Marquette University – Data Analytics

- Developed a classification model for credit approval using supervised learning methods and analyzed relationships between credit access and financial well-being.

EDUCATION

M.S. in Data Science

Machine Learning Specialization

Marquette University

Aug 2026 (Expected)

B.S. in Statistics

University of Wisconsin-Madison

May 2020

B.B.A in Finance

University of Wisconsin-Madison

May 2020

TECHNICAL SKILLS

Programming Languages: Python (NumPy, Pandas, Scikit-learn, Dash), SQL (SQL Server, SQLite), R

Data Engineering & BI Tools: Git, Power BI, ETL (Adeptia), Microsoft Report Builder, SFTP, REST APIs

Supervised Learning: Linear and Logistic Regression, CART, KNN, Tree Ensembles

Unsupervised Learning: PCA, Hierarchical Clustering, k-Means Clustering

Advanced ML & NLP: Generative Adversarial Networks (GANs), Kernel Density Estimation (KDE), Transformer Embeddings (Text Classification)
